

IUPSYS WEBINAR SERIES: PSYCHOLOGICAL SCIENCE DIPLOMACY

WEBINAR 1

ADVANCING GLOBAL SOLUTIONS: PSYCHOLOGICAL SCIENCE IN A NEW ERA OF DIPLOMACY

In an increasingly interconnected yet polarised world, global challenges require renewed multilateral cooperation. Science diplomacy enables evidence-informed collaboration across nations and systems.

Integrating psychological science has strengthened this process by addressing human factors, bridging divides, and enhancing cooperation.

This webinar introduces science diplomacy to the global psychological community, highlights how psychology has contributed to the science diplomacy ecosystem, and explores new directions to serve humanity in the 21st century and beyond.

Date: May 12, 2026
